About Us

North West Marine, a member of the family owned Union Group Investments was established in 2005 to support the growing demand for commercial marine and aviation solutions within the United Arab Emirates and MENA region. The company's establishment was founded on 30 years of experience in the marine industry both locally and abroad.

Since inception we have strived to grow and develop our operations to provide a wider more complete service offering through the establishment of strategic partnerships with key suppliers and clients. As part of this continuous improvement process we have achieved ISO 9001 accreditation which further demonstrates our determination to provide the best quality product and service there is to offer.

In 2022, North West Marine became an industrial member of the **International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA)**, reinforcing our commitment to manufacturing and supplying products that meet international standards. Additionally, in 2024, we obtained **ICV certification**.

Certifications & Associations

Our Brands

TRITONBUOYS

TRITONBUOYS marine products, proudly manufactured in the United Arab Emirates, are designed to excel in the most demanding environments. They have been rigorously tested and successfully deployed in extreme conditions across the Middle East, showcasing their exceptional durability and long-term performance.

SPX

AIDS TO NAVIGATION

SPX is a global manufacturer for marine aids to navigations (ATON) equipment since 1982. It has become one of the fastest growing manufacturers of ATON in the world. North West Marine has been an authorized distributor of Sealite products in the GCC for the past 12 years.

AVLITE

AVLITE Systems is a world-class solar aviation lighting systems manufacturer with a proven reputation for rapid, innovative, and agile technological solutions designed specifically for defense, government, civil, and humanitarian operations.

Marine Products

Navigation Buoys

We offer a diverse selection of navigation buoys, available in both steel and polyethylene. Our extensive range, featuring products from TRITONBUOYS and SPX, ensures that we can provide customers with a wide variety of aids to navigation, tailored to meet most requirements.

Mooring Buoys

We offer a diverse selection of mooring buoys, available in both steel and polyethylene. Our extensive range, featuring products from TRITONBUOYS and SPX, ensures that we can provide customers with a wide variety of mooring buoys, tailored to meet most requirements.

Marine Lanterns

We provide SPX solar marine lanterns that deliver exceptional visibility, minimal maintenance, and a service life of up to 12 years. SPX solar marine lanterns are versatile, suitable for installation on buoys and fixed marker posts, and offer visibility ranges from 1 to 25 nautical miles.

Marine Products

AtoN Remote Monitoring & Control System

SPX's range of remote Monitoring and Control systems provide users such as major Port Authorities and Coast Guards with the ability to effectively and efficiently monitor and control their AtoN installations from real-time data at an extremely low cost.

Navigation Towers, Beacons and Signage

We take great pride in crafting navigation towers, posts, and signage using steel, polyethylene, and glass-reinforced plastic. Our expertise allows us to produce a diverse array of products, and we can also customize our designs to meet specific customer requirements.

Meteorological Buoys

We can provide customized metrological and environmental monitoring buoys ranging from 500mm to 4000mm in diameter fitted with solar power supply. The buoys can be fitted to attain data such as PH, wind speed and direction, water temperature, water current, turbidity, wave and swell heights, salinity and other metrics that may be required.

Marine Products

Silt Curtain

We offer TRITONBUOYS silt curtains manufactured in the UAE, crafted with high-quality components and available in various designs to accommodate different marine conditions and environments. Alongside our standard range, we provide fully customizable curtains tailored to meet unique challenges and specific requirements.

Swimming Lines & Jellyfish Barriers

As leaders in the UAE, we specialize in manufacturing swimming demarcation lines and jellyfish barrier systems. Utilizing high-quality materials and the expertise of our skilled team, we deliver effective and efficient solutions for your needs.

Dredging Pipes & Pipe Floats

With two decades of experience in the industry, we have observed a growing demand for dredging pipes and floats across the region. In response, we offer a range of locally manufactured TRITONBUOYS dredging floats, available in various sizes and configurations to meet diverse needs.

Marine Products

Environmental Protection Booms

Our environmental protection booms, also known as containment booms, are locally manufactured in the UAE using high-quality components. Designed to withstand a range of marine conditions, these booms are tailored to meet diverse environmental needs. We offer a variety of solutions, including oil booms and debris curtains, customized to suit your specific requirements.

Mooring Equipment

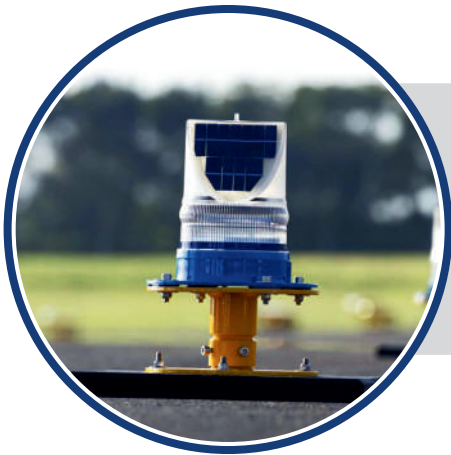

We offer a range of mooring accessories such as synthetic straps, high grade chains, concrete blocks, shackles and swivels in a variety of sizes and grades.

Work Pontoons & Boats

We offer design and fabrication services for customized work boats and pontoons, tailored to meet our customers' specific requirements. These boats and pontoons can be constructed from a variety of materials, including stainless steel, mild steel, aluminum, and polyethylene plastics

Aviation Products

Airfield Lighting

All of Avlite's airfield lights use the latest LED technology as their light source, utilising lenses that are low-powered, high intensity LEDs designed specifically for superior optical performance, are cost efficient and the most reliable lights on the market.

Wind Direction Indicator

We provide customized wind direction indicators, crafted from high-quality components and designed to accommodate diverse installation and environmental conditions.

Helicopter Landing Pad

We specialize in designing and supplying temporary helipads that are optimized for rapid deployment, ensuring quick setup and immediate operational readiness. Our helipads are engineered to meet rigorous safety standards and can be customized to fit various site conditions and requirements.

Aviation Products

Heliport Lighting

Avlite Systems provides complete heliport, helipad, and helideck lighting solutions, from initial design through to commissioning of heliport for commercial applications, private or residential buildings, government installations and hospitals/healthcare industry. Avlite's heliport lighting solutions are designed to the latest standards of the Civil Aviation Code of the country of installation by the Federal Aviation Administration (FAA), and International Civil Aviation Organisation (ICAO) in conjunction with the ICAO Standards and Recommended Practices (SARPs).

Obstruction Lighting

Avlite Systems provide an extensive range of LED obstruction lights and obstruction lighting solutions to clearly mark structures such as telecommunication towers, wind turbines, buildings and tall structures. Avlite has a wide variety of obstruction light models and product options to suit many lighting applications. Models are available in single or dual fixtures, universal AC, universal DC and solar powered units.

Military

Avlite Systems has built a well-earned international reputation for producing the most reliable, innovative solar powered aviation lighting systems in the world earning it the preferred choice and industry's only program of record system approval for US ARMY and US DOD combat solar airfield lighting systems. The Avlite solar aviation lighting systems are currently operating throughout the Middle East.

Our Services

With over two decades of experience in the marine and aviation industries, we have established ourselves as experts in the field. This extensive expertise enables us to provide a range of specialized services, all of which can be customized to meet our customers' unique needs and requirements

Installation

Drawing on our extensive experience in the marine and aviation industries, we offer a comprehensive installation service that includes testing and commissioning. Our team ensures that every aspect of the installation is meticulously handled, providing a seamless and efficient setup tailored to your specific needs

Repairing

We take great pride in our ability to provide skilled technicians for repairs on our product range. Our team is dedicated to ensuring that any maintenance or repair needs are addressed promptly and effectively, guaranteeing continued performance and reliability of our products

Maintenance

We offer service and maintenance contracts to our customers, designed to enhance the longevity of our products and minimize replacement costs. These contracts ensure regular upkeep and timely servicing, helping to extend the lifespan of your equipment and provide cost-effective solutions for ongoing maintenance needs.

Our Services

Design

We have the capability to design tailored solutions for both marine and aviation projects and concepts. Our team of experienced engineers, draftsmen, and specialists is equipped to transform your vision into reality, providing expertise and innovation at every stage of the process.

Consultancy

With our extensive knowledge of the maritime industry, we offer expert consultation for a wide range of projects, including aids to navigation, dredging, beach reclamation, swimming areas, marinas, and aviation helipads. Our experience enables us to provide valuable insights and solutions tailored to your specific needs and objectives.

Buoy Rental

We provide rental solutions for a diverse range of navigation marker buoys, meteorological data buoys, and mooring buoys, suitable for both short-term and long-term projects. Our rental services offer flexibility and convenience, ensuring you have the right equipment for your specific needs and project duration.
